

ART File Reading Instructions

****This requires a Laptop and internet connection****

1. Go to <https://www.efilive.com/download-efilive> and download EFI Live V8 Software (This will not work on a mac)
2. Plug your autocal into the OBDII and into the computer, turn the ignition to the run position without starting the vehicle
3. Open the EFI Live V8 Scan and Tune
4. Select F3: Tune
5. Select autodetect, then click the green "Read" button
6. Once the read is complete save the file in a location that you can easily find it
7. Email the file to support@artuning.ca

Loading the tune file into the device

1. Download the tune file from the email
2. Locate the file and right click and select copy
3. Open EFI Live V8 Explorer
4. The left hand side in the bottom select the Tune folder
5. Right click on the box in the bottom left under filename and select paste
6. This should load the tune file into the handheld device and you can now proceed to program the vehicle
