LYNKING YOUR VEHICLE

BEFORE REMOVAL OF EXHAUST:
Please install Ezlynk app, connect to tuner & receive tune.

1. While connected to the internet or using a mobile data service, open the AutoAgent™ app.(If you do not have this you will need to download from the app store)

2. Follow the prompts on the screen to connect to the Auto Agent and vehicle

3. Once connected to the vehicle close out of the app and reconnect your mobile device to the internet.

4. Re-open the Auto Agent App and Select **Vehicle** from the app menu.

5. If prompted that ECU profiles are available confirm that you wish to accept and proceed to step 6. If not prompted proceed to ECU profiles, if profiles are available skip to step 6. If prompted to add a technician enter *ezlynk@artuning.ca*

6. Proceed through the prompts and enter vehicle information

7. Choose the ECU profile you wish to use, tap the cloud to download then tap install

8. If there is a “preload” or “install first” file in your ecu profiles please install this first, once this is installed then install your desired tune.
